THE ENERGY SAVING CHOICE

Shatter Proof Lamps A New Sales Channel?

Many of us are always looking to grow our sales and expand our offering; we believe every professional falls in this category, therefore we would like to partner with you in expanding your offering.

In the Lighting industry certain applications require shatterproof bulbs; the primary channel for this product is the food industry. All lamps in food processing areas must be coated; this is the law and is enforced by the proper authorities. This is an opportunity that many professionals are usually not aware of and do not pursue, because they do not have the proper supplier. 90% of lighting professionals leave this area to the 10% who are virtually alone with no competition. We invite you to take a look at our offerings and make us your supplier for this unique and vertical channel.

DLU offers a coated version of every bulb in our catalog with a few exceptions. Please contact our office with any special requests.
